

# Outback Experience Early Birders Safari Itinerary

## Tour Itinerary

Enjoy early birding at the Mareeba Wetlands with a guided tour of the best Reserve Woodlands and Wetlands habitats. This guided tour is excellent for seasoned birdwatchers or as an introduction for beginners.

Starting at 7.00am, our expert bird guide will drive you through the Reserve, stopping at habitat sites for bird spotting on the way to Pandanus Lagoon. The early morning is usually also excellent for spotting wildlife. After spending time at the lagoon, to observe the usually plentiful waterbirds and waders and exploring the surrounding savanna in search of forest species, we return to Clancy's lagoon Interpretive Centre and have morning tea where the species sighted can be totaled and verified.
